

ANTI-RUST PRIMER SPRAY

MASTON ANTI-RUST PRIMER is designed for use on lightly rusted metals, works great on bare and previously painted metals. Can be applied directly over the rust, provides great adhesion for finishes. Loose rust should be brushed or sanded away from the surface before priming. The use of Maston Rust-Stop anti-corrosive agent is recommended on rough and rusty metal surfaces before priming. Excellent sanding properties. Can be painted over with most paints after 30 minutes drying time.

BINDER:
Acrylic, Solvent based

DEGREE OF GLOSS (DIN 67530 60 °):
matt 0-25 gloss units

HEAT RESISTANCE: 120 °C
STORAGE STABILITY: 60 months

EU VOC-CONTENT: VOC 639,94 g/L

RECOAT: always, 5 minutes in between layers

SIZE: 400 ml

SALES QTY: 6 pcs

Information valid at 20°C, relative air humidity 20% - 70%
